

ACT- CORP SERVICES

TELECOMMUNICATIONS/ IT SERVICES

- Network and IT systems analysis, design, and integration
- Requirements analysis, site surveys, route planning, BOM, EIP support, backbone, intra-building backbone, and cutover support
- Information Assurance, Cyber Security, Network testing, Certification and Accreditation
- Systems planning, COTS technology/cost assessment, hardware and software selection, procurement, and development
- Cable plant distribution systems for voice, data, and video
- Testing, validation, verification, and certification to BICSI methodologies and TIA standards

ELECTRONIC SECURITY SYSTEMS

- Design, installation, implementation, testing, documentation, and maintenance
- Intrusion detection and access control systems, Closed Circuit Television (CCTV)
- Perimeter and flight line systems
- Weapons storage security systems
- X-ray, barriers/gates, crowd control, annunciators, metal detectors, itemizers and other systems

RF SUPPORT

- Design, survey, and installation of turn-key RF systems
Experience with HF/UHF/SHF Systems
- Construction, repair and inspection of antenna towers and structures
- Test and check out of antenna systems
- RF analysis and siting

BACKUP POWER

- Procurement, engineering, installation and maintenance of primary and backup power equipment
- Uninterruptible Power Supply (UPS)
- Automatic Transfer Switches (ATS)
- Tactical/Containerized UPS
- Generators
- Power panels/power blocks and cabling
- Power quality monitoring

OASIS ENGINEERING SERVICES

- Systems Engineering
- Advanced Technology Pilots and Trials
- Configuration Management
- Design Documentation and Technical Data
- Energy Services to include Management Planning and Strategies, Audit Services and Metering
- Engineering (Aeronautical, Astronautical, Chemical, Electrical, Mechanical, Metallurgy/Materials, etc.)
- Engineering Process Improvement
- Environmental Management
- Life Cycle Management
- Modeling and Simulation
- Natural Resources Management
- Operation and Maintenance or Direct Support of an existing Weapon System or Major System
- Prototyping and Fabrication Support
- Quality Assurance
- Red Teaming and Wargaming
- Requirements Analysis
- System Design
- System Integration
- System Safety Engineering
- Test and Evaluation
- Mission Assurance
- Architecture Design
- System Verification and Validation
- Human Systems Integration
- Baseline (Configuration) Management
- Data Management
- Risk Management
- Systems Engineering Training
- System Security and Information Assurance
- System Effectiveness and Analysis
- Launch Processing and Verification
- Software Development (for non-IT requirements)
- Communications Engineering

POP: 10 Years

Contract Types: Multiple to include Cost-Reimbursement, Fixed-Price, Time-and-Materials, Labor-Hour
